

The Original  
Water-Soluble  
Liquid Packet™

**PAK-IT**  
A full line of  
Innovative cleaning products  
for simplified sanitary maintenance

# WHY BUY WATER?

Introducing An Incredible  
Breakthrough In Liquid  
Cleaning Portion Control...

**Why buy conventional cleaning products that are mostly water when you can use our patented, innovative, portion control system in a water-soluble liquid packet?...**

## Safe and easy to use

No Spills. No waste. No messy cutting, tearing or measuring. Just drop entire PAK-IT into spray bottles, mop buckets, floor and carpet equipment. Entire pouch dissolves easily in water. Eliminates employee exposure to harsh concentrates.

## Saves money

Exact portion control. No excess use as with other concentrates. Cost less than other cleaning chemicals. Provides more program cleaning power than conventional cleaners. No need for expensive proportioning systems from Dema, Knight and Hydro! No costly installation, setup and maintenance! Reduces cost of training employees. Reduces freight costs. Reduces workman's compensation claims - no more lifting of heavy pails and cases.

## Saves space

One case of PAK-ITS replaces up to 20 cases of conventional cleaning products!

## Provides job site portion control

PAK-ITS can be carried to the job. Saves employee time. No trips to costly proportioning devices.

## Color-coded packaging

Color coded PAK-ITS, spray bottles and packaging offer employees quick product identification.

All PAK-IT products are manufactured from the finest ingredients available and tested to rigid professional standards. We unconditionally guarantee our PAK-IT products to perform every time.

## Significant environmental source reduction

No disposal of bottles, pails, drums or other excessive packaging materials.
